CS or ICT

CS session

- Mats out, robots charged.
- Pairs: driver and navigator, swap at the bell.
- Plan on paper before the robot moves.
- One robot per pair — share the floor, not the code.

ICT session

- Mats away, laptops on the desks.
- One laptop each; save to your folder.
- Files named before content.
- Evidence in the portfolio, not on the desktop.

Same room, two habits: plan → build → test → log.
